

OS ASSIGNMENT 1.C

Name: Om Ajit Mule.

PRN:202401040325

Roll No.:147

Div & batch: B / B3

PS: Write a shell script that checks and sets file system permissions for files and directories based on specified criteria, such as ownership and read/write/execute permissions.

Code:

```
echo "-----"
echo "    DISK USAGE REPORT    "
echo "-----"

disk=$(df / | tail -1)

total=(echo "disk" | awk '{print $2}')
used=(echo "disk" | awk '{print $3}')
available=(echo "disk" | awk '{print $4}')
percent=(echo "disk" | awk '{print $5}')

total_gb=$((total/1024/1024))
used_gb=$((used/1024/1024))
available_gb=$((available/1024/1024))

echo "Total Space :${total_gb} GB"
echo "Used Sapce :${used_gb} GB"
echo "Avaliable :${available_gb} Gb"
echo "Dish Usage :${percent} %"

echo "-----"

usage=${percent%%}%

if [ "$usage" -ge 80 ];
then
    echo "WARNING: HIGH DISK USAGE!!!"
else
    echo "Normal Disk Usage."
fi

echo "-----"

df -h --output=source,size,used,avail,pcent,target
```

echo "-----"

Output:

```
omion@OM: ~  
omion@OM:~$ vim permission.sh  
omion@OM:~$ chmod +x permission.sh  
omion@OM:~$ ./permission.sh
